

peace of mind

check and lock your door remotely

At the office or on holiday, use the Somfy Keys app at any time to check if your door is properly locked.

freedom

Manage entrance to your home with Somfy Keys

With the Somfy Keys app, you stay in control who accesses your home. You can set a temporary access code remotely for your family, your tenants, your cousin who drops by unexpectedly, or the person feeding your pet while you are away.

Friday 11:30 a.m.

Hi, how are you? I'm going skiing for a week. Any chance you could come over and feed the cat?

Hello! Sure, no problem. 😊

Great, thanks! Here's the code for the door: 64210.

Monday 10:15 a.m.

Hello, this is the plumber you called about a leak. I'm front of your door.

OK, just a second and I'll open the door. You can get started! 😊

simplicity

a wide range of useful accessories

When you're not home, you can receive a notification on your smartphone when your children get home. Thanks to Door Keeper's badge reader and keypad, no need for keys and no risk of losing them!

Choice of means of access:

Badge reader with keypad

Badge

Bracelet

Smartphone (Somfy Keys app)

In your home

Easy to install:

Somfy's connected motor is simple: no need to change your locks or door, and no need to drill or wire, since the system is battery-powered and Wi-Fi connected. Ask your installer about the best way to fit the system to your door.

Door Keeper uses your household WiFi to notify you on each event.

Compatible with most doors

- Cylinder locks compliant with European security standards
- Multipoint locks
- For doors with or without exterior handle

Check here to see if your door is compatible:

Go further

Door Keeper can easily be used in combination with other smart devices in your home for even more comfort and security:

Camera: I can see who's at my door and decide whether to unlock it or not.

Alarm: When I receive an intruder alert, I can trigger the alarm remotely.

TaHoma: I can create various scenarios: When I leave, the door locks, the shutters close, and the house alarm is turned on.

security

*detect intruders
before they try
to break-in*

Door Keeper monitors your door at all times and detects any abnormal movements. If an intruder comes to your door, you immediately receive an alert on your smartphone. You can then trigger your alarm system to scare them away.

About Somfy

Somfy's leading smart management solutions for homes and buildings have been improving people's daily lives for over 50 years. Developed with comfort, ease of use, security and sustainability in mind, our innovations automate and connect rolling shutters, curtains and blinds, gates and garage doors, lighting and heating, alarms systems and more. We are committed to creating useful solutions that are accessible to all, designed for today and beyond.

intrusion sensors

somfy®

Door Keeper

**The front door:
the primary access point
to your home.**

The front door is the main entrance to the home and, above all, a vulnerable area in terms of security. Our day-to-day lives can be hectic... Is the front door locked? Who's coming in? Who's going out? How can you allow people access to your home remotely?

Somfy's new smart electric locking mechanism gives you greater freedom. And, most important of all, it makes your home more secure. More than just a point of entry, the front door becomes an active feature of your home security.

Did you know?

+ 60% of burglars get into the home through the front door.*

Somfy Exclusives

Intrusion sensor

Our IntelliTAG™ system detects vibrations when intruders appear at your door, even before they break in. This lets you trigger your alarm system* to scare them away.

*Alarm system sold separately

Closure sensor

This lets you check the status of the door (open/closed, locked/unlocked) at any time, and lock it remotely to keep your home secure.
