

Yslo io

MOTOR RANGE FOR ALL SWINGING SHUTTERS

The best technology for swinging shutters

Designed
by and for
professionals

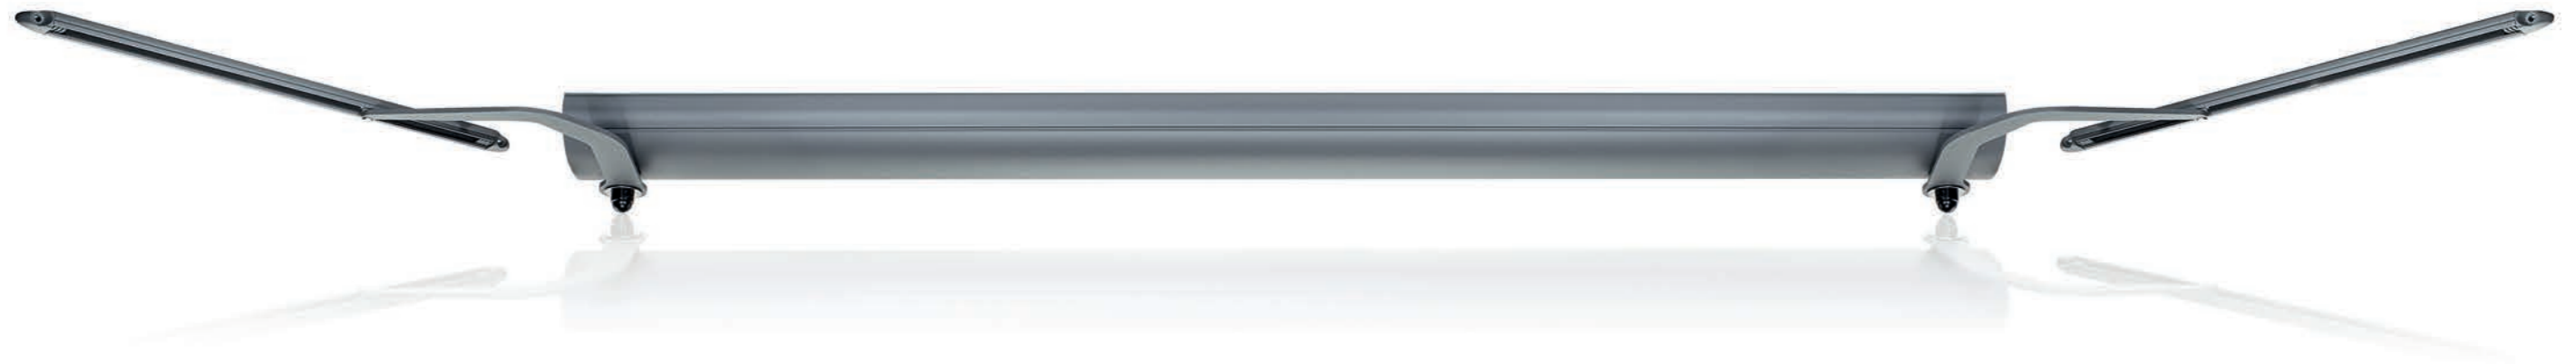

somfy®

Yslo io technology is
the first range of motors
for connected swinging shutters
on the market, signed by Somfy.

A new generation of motors dedicated
to swinging shutters co-developed
with professionals....

**For greater reliability,
advanced functionalities
and increased performance.**

A completely new offer allowing you to work
in complete serenity.

Yslo io, an easy installation

An easier installation

The motor has been completely redesigned for ease of installation, in any case, even the most complex :

- Lighter motors, particularly suitable for installation under lintel.
- Automatic end-limit switches.
- No need to open the housing to program the motor (adjustment from the control point).

A quick 3 step installation*

1 hour of solo installation for Yslo Flex io!

1

Fixing the rails,
motor slip and wiring.

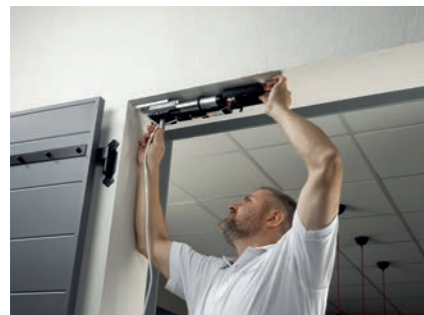

2

Installing the housing
and assembly of arms and slides.

3

Programming

Drilling
template

Adjusted
directly with
the control
switch

* without power supply

Yslo io, new generation

A complete connected ecosystem, composed of tools and exclusive online services to make your life easier, from quotation to user services.

Dedicated
Yslo io
Custom
App

New Somfy exclusivity:

the app that will make your life easier

- Easy to handle, step-by-step guidance to take and enter dimensions without risk of error
- Direct sending of the motor order form

SET&GO io, your installation tool for all io-homecontrol® projects

- Intuitive, let us guide you, no need for an instruction manual
- 100% successful programming, no risk of error
- Wireless, nothing to connect to the motor

SERV-E-GO, your remote diagnosis and maintenance tool

Visualize...
all your customer's connected equipment quickly.

Diagnose...
from your screen (product status and history, failure qualification).

Reconfigure...
from your office (access to the installation and modification of settings with customer agreement).

2 ranges to meet all market needs

Yslo Flex io

The standard motorization
which covers 80% of installation cases

1 or 2 panels, 2 colour choices:

- A motor kit to store, ready to install
- Kits adapted to shallow depths under the lintel

Yslo Custom io

The universal customised motorization, 100% of the
market covered in renovations or new construction

- Compatible with all types of shutters from 1 to 4 panels, including the most complex configurations (pre-frame shutters, overlap,...), all materials (wood, resin, PVC, aluminium).
- Available in many colours or unpainted

Dedicated app
to make
measurements
taken easier

Yslo io, Somfy reliability

- 5-year warranty
- Tested 15,000 cycles
- Optional backup battery
- Made in France

More than
60 million
windows equipped
with swinging shutters

Yslo Flex io
Yslo Custom io
100% compatibles with:

- the Eolis 230V io wind sensor, **NEW**
- the Sunis II Wirefree io sun sensor,
- alarms (via TaHoma),
- timers (Nina Timer io and Chronis io).

Yslo io, a must for everyone

Comfort, aesthetics and safety...
Yslo io, the best of Somfy for everyone.

Enjoy maximum comfort

All the advantages of controlling via smartphones, real-time feedback and the richness of possible scenarios through the associated sensors.

Maintain an aesthetic facade

A motor with personalized colours for discreet integration, compatible with all types of shutters and which does not reduce daylight due to its small size.

Stay confident in all circumstances!

In addition to a perfect closing of the shutters, Yslo io is a concentrate of innovations:

- Wind **protection**
- Anti-finger pinch **safety** function
- **Long service life** due to smooth docking
- **Compatible** with the backup battery
- Obstacle **detection** and freeze **protection**

OPTIMAL WIND PROTECTION

Compatible with Eolis 230V io wind sensor

As soon as the sensor detects the wind level you have set, the motor places the panel in the optimal position to ensure its protection:

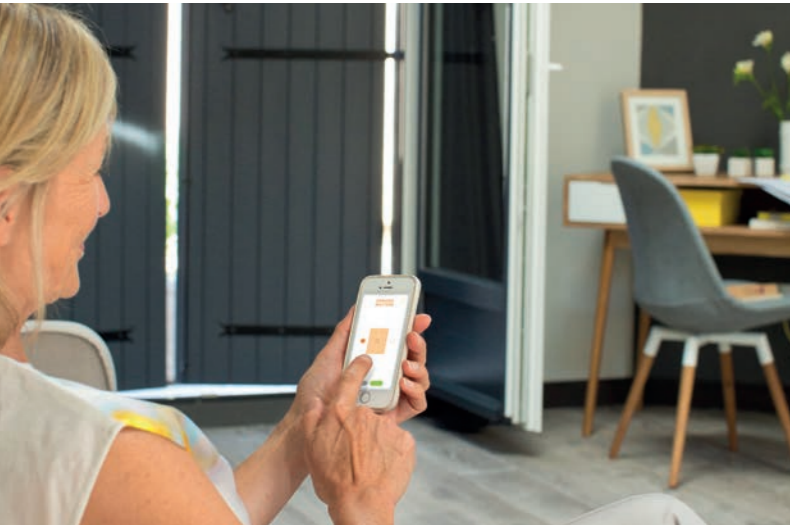

- If it is open or closed, it remains in its position
- If it is half open, it automatically goes to the nearest limit switch.

Placing the panels in a safe position in the case of wind gusts

Fuses on the arms to protect the motor and panels

"No longer a chore, in one click I open and close all my shutters, even the most inaccessible ones, without having to lean out the window!"

"Now we can enjoy the charm of tradition as well as technology!"

"We think we forgot to close our burglar-proof swinging shutters when we left? Don't worry, we can check and close them remotely."

"Whatever the conditions: that I am absent, that it is windy... I keep my mind perfectly calm."

The connected world opens to swinging shutters

From now on, even swinging shutters are entitled to the best of technology. With Yslo io, from a smartphone or tablet, your customers can pilot, verify, imagine and automate all their life scenarios.

TaHoma®

The home automation box that allows you to control and interact with all the equipment in the house.

For example, when you leave for work in the morning, close swinging shutters, garage doors, gates, etc., turn off the lights, turn down the heating and activate the alarm.

And of course wall switches and remote control points...

About Somfy

Somfy's leading smart management solutions for homes and buildings have been improving people's daily lives for over 50 years. Developed with comfort, ease of use, security and sustainability in mind, our innovations automate and connect rolling shutters, curtains and blinds, gates and garage doors, lighting and heating, alarms systems and more. We are committed to creating useful solutions that are accessible to all, designed for today and beyond.
