

About Somfy

Somfy's leading smart management solutions for homes and buildings have been improving people's daily lives for over 50 years. Developed with comfort, ease of use, security and sustainability in mind, our innovations automate and connect rolling shutters, curtains and blinds, gates and garage doors, lighting and heating, alarm systems and more. We are committed to creating useful solutions that are accessible to all, designed for today and beyond.

Video Door Phone V500 PRO io

Easy to use,
premium functions.

Easy to use !

The interface is designed to be highly intuitive and allows you to operate it without a hassle.

Fully customisable, you can configure it to suit your needs or desires (customise the home screen, music, choice of icons, etc.).

Decide who enters and leaves your home !

Thanks to its wide view angle camera, night vision and image memory (takes photos of your visitors when you're away), you can know who is calling or called at your door, day or night.

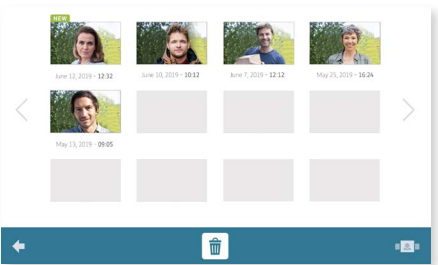

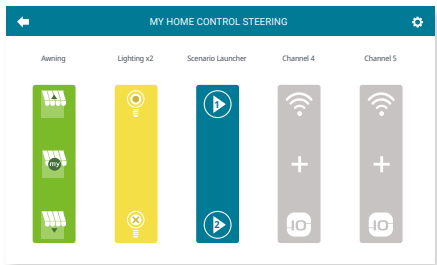

From the indoor monitor(s), you'll be able to hear and talk to your visitor and open your gate if you want to.

Control your home equipment

Thanks to the io-homecontrol® radio control integrated into your video door phone, you can control up to 5 devices or groups of devices directly from your indoor monitor.

You can very easily open or close your garage door, roller shutters, gate or manage your lighting: everything is centralised!

Make your
everyday life easier!

08:00

I'm leaving home

No more running around!
From the video door phone indoor monitor, I can close the shutters, turn off the lights, open the garage door and the gate.

15:00

Sylvie, our neighbour, drops by

Unfortunately, I missed her as I wasn't home. I'll still know she dropped by because my video door phone took her photo and saved it. So, I'll never miss a visit!

18:00

When I'm back home, a man shows up

An audible signal immediately alerts me and I can see his face straight on the indoor monitor. I don't know him and so decide to pretend I'm not home. As a precaution, I can still take a photo of the stranger.

19:00

Alexia and Paul come over for dinner

We greet each other via the video door phone speaker and microphone. Using the indoor screen, I open the gate for them.

Customisable
7" touch screen

Night vision

102° Wide
view angle

Display of the outdoor
temperature

History of missed
visitors

Communication
between 2 monitors

Open / close
the gate

Control 5 io-homecontrol®
